Curriculum and Career Pathways

- “I learned so much not only about librarianship, but about myself and what I am capable of accomplishing. This program helped me narrow my career focus in librarianship and information science.”

- “I was able to develop internships in my areas of interest in my region.”

- “I have already recommended this program to several people. The classes were great, and gave me more perspective as to how the skills learned could be used. My dad graduated from this school with the same degree, so I'm glad I took his advice when he recommended this university!”
