Teacher-librarian
Emerging technologies librarian
Reference librarian
Literacy specialist

Prepare for a career in the rapidly expanding field of library and information science

Our MLIS graduates are information professionals who know how to tap into emerging technologies to connect people with the information they need to be successful. They work in public libraries, schools, hospitals, law firms, museums, colleges and universities, businesses, corporate information centers, and government agencies. A career as an information professional is always fresh and challenging, with skills that are in high demand.

Our nationally ranked MLIS program is fully accredited by the American Library Association, and our School has been awarding graduate degrees to information professionals for more than 50 years.

Program Highlights

Live anywhere and take advantage of the convenience and flexibility of a **fully online format**. Students interact with peers and instructors through web conferencing, social networking platforms, a web-based learning management system, and immersive environments. Our required one-unit emerging technology course prepares new students to effectively use these tools. By using sophisticated technology, our students are better prepared to successfully navigate a rapidly changing information landscape and apply technology in their professional lives.

Take advantage of our **flexible** MLIS program. A combination of required courses and electives allow our students to tailor their MLIS degree to their personal strengths and interests, while demonstrating the profession's core competencies. Our students choose from an amazing variety of courses. They can build their program around the type of environment they want to work in after graduation, or they can choose to emphasize a specific aspect of library and information science.

Study full time or part time.

Students can vary their workload each semester, balancing their academic schedule with their personal and professional responsibilities.
